Name and location of each plant must be specified. (See accompanying instructions in regard to transportation and merchandising activities.)

10. POWER EQUIPMENT.—Give figures for equipment as of the end of the period covered by this report.

Important Note.—The form of this inquiry is different from that previously used, the purpose being to distinguish between active and inactive prime movers and generators. It is desired, at the same time, to obtain a total which shall be comparable with that reported at the 1927 census, when the inquiry called simply for a combined total of "all power equipment in the plant, active and emergency." By "emergency" equipment is meant that which is capable of being put into operation promptly but which is used only in case of breakdown of the active equipment or at rather rare intervals when an exceptional load occurs. Equipment which is regularly used, but not usually on full time, should be classed as active.

MAN-HOURS (a man-hour is one hour of work by one person.)—Report, from the pay roll, the total number of man-hours actually worked during each month by all the wage earners reported under Inquiry 5, page 2. CONFIDENTIAL GOVERNMENT REPORT

File No. 24-84971

The law requires every manufacturer to report to the Bureau of the Census and provides penalties for failure to do so. This law also provides that no one not a sworn employee of the Bureau of the Census will be permitted to examine your report, and no information can be given to any person, whether in Government service or in private life, which would disclose, exactly or approximately, any of the facts or figures in your report. This schedule should be filled out promptly and held until called for by a representative of the Bureau.

Schedule No. 1

(F) Schedule Received
5-4-36CENSUS OF MANUFACTURES, 1935
REQUIRED BY ACT OF CONGRESS APPROVED JUNE 18, 1929
MAY 14 1936 CENSUS MAY 12

WOMEN'S AND CHILDREN'S READY-MADE CLOTHING; CORSETS AND ALLIED GARMENTS

GENERAL INSTRUCTIONS. Please read these instructions carefully before filling out the inquiries in this schedule. Both sections of the schedule should be filled out in detail, book figures being used if possible.

(a) These reports should relate to a plant and not to a general office or branch office (as explained under f, below). General administrative offices located elsewhere should be reported on a separate schedule entitled "Administrative and General Offices Schedule." (See General Instructions, section 6, above.)

(b) The data reported for the *Census of Manufactures* should cover all your production activities, your power plant, and such auxiliary activities as manufacturing, warehousing, etc., at the same location, but should NOT cover merchandising (buying and selling products made by others) or the operation of canteens (unless you report for the *Census of Business*, on the last sheet).

(c) If you maintain a separate sales department, do not include data for it in your report for the *Census of Manufactures*; give these data only in the report for the *Census of Business*, on the last sheet.

(d) Neither report should include data for construction of or additions to plant, or for new installations or major replacements of equipment.

(e) In general, a schedule should be filled out for each plant, but combined reports may be made for two or more plants engaged in the same line of manufacture located in the same county, except that separate reports must be made for plants located in different cities, towns, or villages having 10,000 or more inhabitants.

(f) Great care should be taken in answering the question (Inquiry 1-3) as to whether the plant is located within or outside the city, town, or village boundaries, since the accuracy of all day statistics depends on the correctness of the answers to this inquiry.

(g) In case your plant is not situated within the limits of an incorporated city, town, or village, name the division of the county in which the plant is located and specify whether it is a township or other geographical unit. (The post-office address is not sufficient, as in some cases a plant may receive its mail from a post office in a different county or in a different State.)

(h) These reports should relate to the calendar year, 1935, but, if necessary, they may be made to cover the business or fiscal year ending within the period from April 1, 1935, to March 31, 1936. In either case, a full year's operation should be covered unless the plant began to operate or ceased to operate within the year.

(i) If the plant was purchased, sold, or leased within the year, give under "Remarks" the name of the seller, buyer, lessor, or lessee.

(j) If your books do not give the information required, certain items should be supplied. Answer all inquiries applicable to your business. If you do not, it will be necessary to obtain the missing information from you by correspondence.

(k) Monetary items should be given to the nearest dollar; omit cents.

(l) Remarks.—Under "Remarks," explain any statements or figures that appear to be inconsistent; for example, excess of reported expenses (salaries, wages, and cost of materials, fuel, etc.) over value of products.

INQUIRY 1. DESCRIPTION OF PLANT.—How many separate plants or factories does this report cover? 1

If more than one, give names and locations under "Remarks." (See "General Instructions," above.)

INQUIRY 8. POWER EQUIPMENT.—The figures given in this inquiry should relate to equipment in use or available for use at the end of the period covered by the report.

PRIME MOVERS AND GENERATORS

Report as "Prime-mover-generator units" all generators in the plant, together with the prime movers driving them, whether direct-connected or connected by gears or by belts, including prime movers driving both generators and line shafts or other equipment. Do not include rotary converters and motor-generator sets. Give the rating indicated on the nameplate. If the unit is rated only on the generator, the horsepower rating of the prime mover should be reported as one and one-half times the kilowatt rating of the generator.
